

## Shelter Recovery Illustrated Strategy - 8th Nov 2011

## SHELTER REBUILD: INCREMENTAL IMPROVEMENTS

Self-build using traditional and affordable styles and techniques Support includes conditional cash, skilled builders, materials, training

Examples of incremental improvements:

Site:- Higher ground - improved drainage

Foundation: - Raised plinth - thicker walls at base - lime render

Walls:- Min 18" thick walls - mud blocks overlap

**Roof:**- Ring beam to spread load - additional roofing members

- plastic sheet waterproofing - slight overhang

## **MOBILE TRAINING TEAMS**

Training teams visit affected villages and train:

- Masons and construction workers
- Homeowners

In simple shelter improvements, repair, maintenance and upgrade.

## **COMMUNICATIONS**

- Learning from flood affected people about what the issues are
- Clear messaging
- Transfer knowledge within and between communities
- Use the best media for the job!
